|---|---|---|---|---|---|

## Alert by duress code

You also can alert your Protectas Monitoring Center (RCC) in case of arming or disarming your system under threat of force. For this purpose, just add «1» to the last digit of your code. Example of a disarming of the total zone under threat of force: 1234 => 1235, 6789 => 6780).

The LEDs of the control panel show the status of your security system.

| Control Panel | ⚡ | 🔒 | 🚪 | 🚨 | 🔧 |
|---|---|---|---|---|---|
| **Keypad** | | 🛡 | △ | 🔔 | ⚒ |

### LED indicator «AC mains power»
**On:** The Control Panel is supplied from the mains.
**Off :** The Control Panel is out of service and the battery is low.
**Flashing:** There is a mains power failure - The Control panel is supplied by built-in battery.

### LED indicator «System Armed»
**On:** The system total set is armed.
**Off :** The system is disarmed.
**Flashing:** The system part or annex set is armed.

### LED indicator «Detector Activated»
**Flashing:** It means that one of the window or door protected by a magnetic contact is opened. It flashes until the window or door has been closed.

### LED indicator «Alarm Memory»
**On:** It means that an intruder alarm occurred while the system was armed.
**Flashing:** It means that an alarm occurred while the part set or annex set was armed. The indicator remains ON until the next arming.

### LED indicator «Technical Fault»
**On:** It indicates a fault on a technical channel.
**Flashing:** It indicates a fault on the system. (Battery fault, Supervision, Tamper, Phone line failure or Radio jamming). The indicator remains ON or FLASHING until the condition has been cleared.

## Keyfob

The keyfob has 4 buttons and 3 LED indicators. The LEDs show the status of your alarm system.

**Alarming system « Total »**
